

Umesh Karunarathna

Field Service Support Technician

Burnaby, BC | (672) 551-9995 | umeshkarunarathna97@gmail.com | linkedin.com/in/umeshkarunarathna | github.com/umeshkarunarathna

PROFESSIONAL SUMMARY

Technical Support and Network Operations professional with 3+ years of experience supporting enterprise systems, monitoring infrastructure, and resolving technical incidents in fast-paced 24/7 operational environments. Skilled in troubleshooting hardware, software, and network-related issues across Windows and Linux environments, with hands-on experience in system monitoring, incident management, technical documentation, and customer support. Experienced working in high-availability operational settings where system uptime, responsiveness, and accurate reporting are critical. Recently completed a Post-Baccalaureate Diploma in Cybersecurity at Douglas College with a GPA of 4.11.

TECHNICAL SKILLS

Operating Systems: Windows Server 2019-2022, Windows 10/11, Linux, macOS

Networking: TCP/IP, DNS, DHCP, VLANs, VPN, routing & switching, LAN/WAN, Wi-Fi troubleshooting, Meraki APs, Cisco ISE & ACI

Directory & Identity: Active Directory (user management, GPO), Microsoft Entra ID (Azure AD), Microsoft 365 administration, Intune (endpoint/device management)

Security & Firewalls: Palo Alto, Fortinet, Cisco ASA, Citrix ADC/SDX, network vulnerability scanning

Monitoring & ITSM Tools: OP5, ConnectWise, ServiceNow, JIRA, ITIL v4 incident, change & request management

Cloud & Virtualization: AWS (EC2 instances), Citrix, VMware ESXi, vSphere, Oracle VirtualBox, Wazuh SIEM

Scripting & Automation: Python, Bash/Shell scripting, PowerShell, Nmap

Cybersecurity: SIEM, log analysis, vulnerability management, endpoint security, phishing awareness

Productivity & Collaboration: Microsoft 365 (Teams, SharePoint, OneNote), Office Suite

Endpoint & Technical Support: Hardware/software troubleshooting, desktop setup, remote support, technical documentation, incident reporting

Soft Skills: Customer support, troubleshooting, cross-functional communication, operational monitoring

PROFESSIONAL EXPERIENCE

Student Assistant - Computer Labs Douglas College | New Westminster, BC | September 2024 – May 2026 (*Part-Time*)

- Provided first-line technical and academic support to students across Windows and Linux lab environments.
- Supported 15+ students per shift with hands-on troubleshooting of OS, virtualization, and networking concepts.
- Communicate complex technical topics clearly to users with varying technical backgrounds, maintaining a patient and approachable support style.
- Document recurring issues and contribute to knowledgebase articles, reducing repeat escalations to senior staff.

Sports Advisor - Fitness & Team Sports Decathlon | Burnaby, BC | May 2025 - Present (*Part-Time*)

- Deliver customer-focused service to 30+ customers daily, assessing needs and recommending solutions.
- Collaborate in a fast-paced team environment, demonstrating adaptability, communication, and time management under pressure.

Systems Engineer - Network Operations Center (NOC) IFS | Colombo, Sri Lanka | November 2020 - December 2023

Played a key role in building the NOC from the ground up; standardizing incident handling workflows, monitoring procedures, and reporting structures that improved operational efficiency and reduced response times across a 24/7 global network environment.

- Maintained continuous availability of global IFS network infrastructure across 3+ regions on a 24/7 shift roster, triaging and resolving 15+ incidents daily within defined SLA targets.
- Configured and managed enterprise firewalls (Fortinet, Palo Alto NGFW, Cisco ASA), DNS/DHCP servers, and Citrix ADC/NetScaler SDX appliances supporting 1,000+ users.
- Designed and deployed network infrastructure for 5+ new branch offices, including VPN setup, routing configuration, and end-to-end connectivity validation.
- Administered hybrid identity and device management using Active Directory (user provisioning, GPOs), Microsoft EntraID (Azure AD), and Intune for access control, policy enforcement, and endpoint compliance.
- Performed scheduled upgrades on network devices and firewalls with zero unplanned downtime, following ITIL v4 change management procedures.
- Monitored real-time network performance using Nagios-based tools across 200+ devices, proactively identifying and resolving incidents before business impact.
- Conducted regular vulnerability scans across network infrastructure and drove remediation of identified risks within SLA windows.
- Managed datacenter infrastructure using Cisco ACI and coordinated network relocation projects with minimal service disruption.
- Engaged with 10+ external vendors and partners to resolve third-party hardware and software issues, maintaining clear communication and escalation records.

EDUCATION

Post-Baccalaureate Diploma - Computer and Information Systems

Major: Cybersecurity | April 2026 | Douglas College | Cumulative GPA: 4.11 / 4.33 | New Westminster, BC

Relevant Coursework: Operating Systems, Virtualization & Computer Networks, System Analysis, Evidence Imaging, Scripting for Cybersecurity, Cloud Infrastructure, Advanced Integrated Software Development (Java), Network Cybersecurity, Cloud Cybersecurity, Mobile Cybersecurity.

Key Projects:

- **AI-Powered SOC Assistant:** Built a locally hosted LLM-based SOC assistant using Ollama (Mistral), AWS EC2 instances, and Wazuh SIEM; integrated Ubuntu and Kali Linux endpoints to simulate real-world threat detection and log analysis workflows.
- **Gamified vs. Traditional Security Awareness Training:** Designed and conducted a controlled experiment with non-IT Douglas College students to evaluate the effectiveness of gamified training against traditional methods in improving resilience against spearphishing attacks.
- **Android Forensic Analysis:** Performed mobile forensic investigation using ADB, ALEAPP, and MobSF to analyse Android applications and APKs, extracting and interpreting digital evidence.
- **Enterprise Security Hardening & Monitoring:** Hardened an Ubuntu server environment covering account and password policies, network security, kernel hardening, logging, and auditing using industry-standard frameworks.
- **Host & Port Scanner:** Developed a port scanner using Python and Nmap to identify live hosts and open ports across a target network.

Bachelor of Science (Honours) - Computer Networks

First Class Honours | Graduated July 2020 | University of Plymouth | Plymouth, UK

Key Projects:

- **Dynamic Bandwidth Management:** Designed an adaptive network bandwidth allocation algorithm based on real-time user behaviour analysis.
- **Centralized Network Management:** Configured Group Policies and user management using Microsoft Active Directory in a simulated enterprise environment.

CERTIFICATIONS & LICENSES

Certified in Cybersecurity (CC) ISC2 | May 2024

ITIL v4 Foundation AXELOS | August 2021

Introduction to Cybersecurity Cisco Networking Academy | May 2020
